PROFESSIONAL SUMMARY

I am a motivated Computer Science and Engineering student at Ahsanullah University of Science and Technology with hands on experience building full-stack web applications. I am mostly proficient in the Laravel and React ecosystem with exposure to the MERN stack. I can deliver end to end solutions from frontend to backend API integration and cloud deployment.

PROFESSIONAL EXPERIENCE

Aspire Internship Program | NexGenix Ltd. 2026-Present
Full Stack Developer Intern (Remote Internship)

- Contributing to web application development and assigned software development tasks.
- Working with modern frontend and backend technologies in a professional development environment.
- Gaining practical experience in full-stack development and collaborative software development.

EDUCATION

B.Sc in Computer Science and Engineering 2023-Present
Ahsanullah University of Science and Technology (AUST)
3rd Year, 2nd Semester (3/2)

Higher Secondary Certificate (HSC) – Science 2022
Dhaka College
GPA: 5.00/5.00

Secondary School Certificate (SSC) – Science 2020
Dhaka Shiksha Board Laboratory School and College
GPA: 5.00/5.00

TECHNICAL SKILLS

Languages : C, C++, C#, PHP, JavaScript, Python, Java
Web Development : React, Next.js, Node.js, Laravel, Tailwind CSS, REST APIs
Databases : MySQL, MongoDB
Tools & DevOps : VS Code, Postman, Git, GitHub Actions, Docker, Railway, Render, Vercel
Languages Spoken: Bangla (Native), English (Fluent), Hindi (Conversational)

PROJECTS

SOFTWARE PROJECTS:

1. CareMeds - An Online Pharmacy Platform 2026
Stack: Laravel, React, MySQL

GitHub Link: https://github.com/Mushfiq-Srijon/CareMeds-SD
Live link: https://care-meds-sd.vercel.app/

- Led full-stack development in a team of 4, building a complete online medicine ordering system.
- Implemented role-based access control for admin, pharmacy, and customer roles.
- Built cart, checkout, invoice generation (PDF via DomPDF) with automated email delivery.
- Integrated Steadfast courier API for delivery tracking and built a pharmacy admin dashboard.
- Deployed via Railway and Vercel.

2. Ed-Bridge - Academic Resource-Sharing Platform for Students 2026
Stack: React, JavaScript, React Router, CSS, ASP.NET Core Web API, .NET 10, Entity Framework Core, MySQL, JWT, Swagger, Stripe, Docker

GitHub: https://github.com/Mushfiq-Srijon/Ed-Bridge
Live: https://ed-bridge-mu.vercel.app/

- Team academic project.
- Developed a full-stack platform for students to share academic notes, participate in discussions, and exchange educational materials.
- Implemented PDF note uploads, downloads, search, subject filtering, ratings, comments, bookmarks, and content reporting.
- Built a discussion forum with posts, replies, upvotes, downvotes, following, bookmarking, and moderation features.
- Developed a marketplace with listing management, search and filtering, cart, checkout, orders, and buyer–seller messaging.

- Implemented JWT-based authentication, role-based authorization, profile management, admin controls, user suspension, and analytics.
- Integrated Stripe checkout, Google authentication, email services, and PDF invoice generation.

3. FetchBucks - An Expense Tracker and Manager 2026
Stack: Stack: Laravel, React, MySQL

GitHub link: https://github.com/Mushfiq-Srijon/fetchbucks
Live link: https://fetchbucks.vercel.app/
- Monthly budget setup, category-wise expense tracker
- Summarized dashboard including budget calculations
- Traverse through different monthly records

4. Kickscape - A FIFA World Cup 2026 Hub 2026
Stack: Laravel, React, MySQL

GitHub link: https://github.com/Mushfiq-Srijon/Kickscape
Live link: https://kickscape.vercel.app/

- Real time match schedule with date, BD time and stadium
- Real time team standings with group stage detailed points and full tournament bracket
- Every player's information (only players who are playing in the world cup 2026)
- Used free world cup API from footballdata.org
- Implemented AI chatbot (Groq API)

5. JobHut - A Job Listing and Finding Web App 2025
Stack: Node.js, Express.js, React, MongoDB (MERN)

GitHub link: https://github.com/Mushfiq-Srijon/JobHut

- Team university project built using the MERN stack.
- Responsible for parts of frontend including UI design, component structure, and routing.

HARDWARE PROJECTS:

1. Smart Medicine Reminder Box 2026

Tools and Softwares:

Softwares: Arduino IDE, Proteus

Tools: Arduino UNO, Breadboard, Buzzer, Servo Motor, Jumper wires, LED lights, Push buttons, 16x2 LCD Display with I2C adapter, Ultrasonic Sensor, Real time clock module (DS3231 AT24C32 I2C).

- Team university project
- Aimed to solve forgotten medicine intake and timing
- Both visual (LED) and audio alarm (Buzzer) according to each time
- Users can set 3 alarms throughout the whole day manually
- Missed medicine memory
- Real clock time track
- Automated appropriate lid opening using Ultrasonic Sensor

INTERESTS

- Problem Solving
- Artificial Intelligence
- Technology
- Gaming
